

# Dedicated Web Hosting

Turbo boost your hosting services, with vCloud Hosting's dedicated professional hosting solution.

As a business that manages around 100 hosting accounts worldwide, we were finding our websites continually slowing down. Our clients were struggling to obtain information from our websites, and were getting annoyed with the time it was taking for each page to load. Over the last 15 years we have hosted our websites in some of Australia's premium hosting providers. As their business continued to grow, we saw their bandwidth wasn't as fast as when we first signed up.

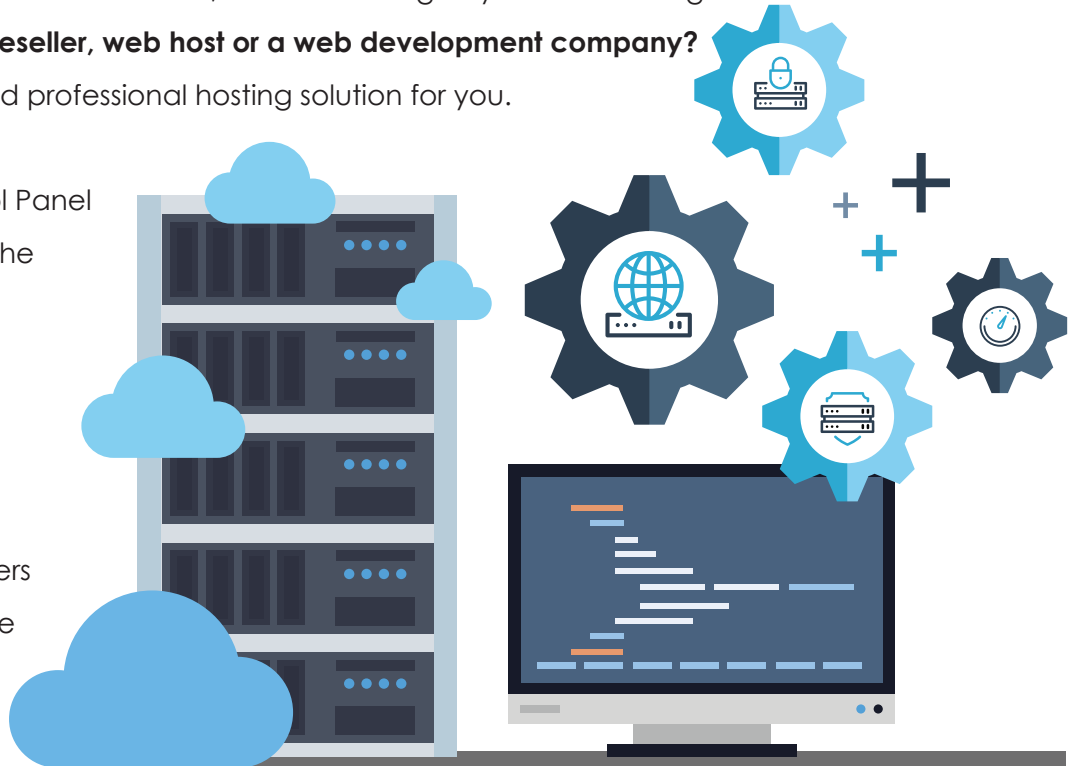

This created issues for us as the end user. To fix this problem, we created our own hosting server platform within our IBM Cloud datacentre. This gave us the sole use of near unlimited bandwidth and allowed our websites to run faster and more efficient than ever before, without making any website changes.

**Are you a business like us? ie. a reseller, web host or a web development company?**

vCloud Hosting has the dedicated professional hosting solution for you.

**Turbo boost your websites with:**

- latest cPanel & WHM Control Panel
- LiteSpeed Webserver & Cache
- JetBackup
- individualised packages
- 10Gbit internet backbone
- premium 24/7 support
- assisted domain migrations
- your own private name servers
- generous bandwidth/storage
- reseller accounts available or have your own virtual or dedicated server.

**For startup hosting providers or web developers**  
needing to start small before scaling to a dedicated server

**For established hosting provider or web developers**  
with the need to have a dedicated server with between 75-300 domains
